Miller Environmental Corporation (Miller) operates a fully licensed hazardous waste disposal company in Manitoba, providing a final local disposal option to our customers.

Our goal to “safely manage hazardous waste” is accomplished by incorporating procedural soundness in every action we take, with an emphasis on mitigating all possible environmental impacts, while taking into account all safety and health aspects associated with the management of hazardous waste.

We are the only hazardous waste management company in Canada that has an integrated management system (IMS) that includes three recognized certifications: ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007.

Miller provides comprehensive and environmentally sound industrial waste management services to a wide range of industries.

Our modern, fully licensed facility is located 70 km south of Winnipeg, Manitoba and is the only one of its kind in Central North America.

LIST OF SERVICES

Miller Environmental Corporation offers a wide range of services that support and complement environmental professionals, industry, government and businesses. Working alongside consultants, engineers, and contractors, we can provide the tools to assist in the completion of environmental projects and manage hazardous waste requirements.

Our scope of services includes:

- ◆ Hazardous Waste Collection and Treatment
- ◆ Household Hazardous Waste Program Management
- ◆ Soil Treatment (inorganic/organic contaminants)
- ◆ On-site Chemical Lab Packing
- ◆ Polychlorinated Biphenyl (PCB) Management
- ◆ Project Management
- ◆ Emergency Response Services
- ◆ Confined Entry
- ◆ Training
- ◆ Chemical and Container Supply
- ◆ Tank Pump-outs/Clean-outs
- ◆ Custom Designed Roll-off Bins
- ◆ Roll Off Services (bins, vacuum boxes)
- ◆ Container Washing and Cleaning
- ◆ Special Waste Recycling
- ◆ Industrial Plastic Recycling

PROCESSING CAPABILITIES

Miller Environmental Corporation operates a state-of-the-art hazardous waste treatment facility south of the City of Winnipeg, utilizing 64 hectares of land in the RM of Montcalm. We employ a highly trained technical staff that have developed and streamlined our in-house processes focusing on safety, energy efficiency and reducing environmental impacts.

On-site processes include:

Aqueous Waste Processing

- Acid and alkali neutralization
- Metal/salts precipitation and removal
- Emulsified water/oil separation and disposal

Inorganic Processing

- Wet or dry inorganic sludge solidification & disposal
- Capability to ship some high value metal salts for recycling
- Stabilization of metals
- Fluorescent tube shredding, stabilization & solidification (or shipping for recycling as per customer wishes)
- Chemical processing for a vast array of inorganic chemicals
- Stabilization of processed chemical residues (salts)

Liquid Organic Waste Processing

- Sludge/water separation
- Solvent/fuel blending
- Latex paint bulking & solidification (or shipping for recycling as per customer wishes)
- Oil based paint bulking/fuel blending
- Oil filtering and sludge separation

Organic Processing

- Solidification and disposal of oily debris, non regulated oily materials
- Grease/solvent - fuel blending
- Oily sludge fuel blending
- Dissolution of solid materials (including pharmaceuticals), preparation for disposal to incineration for specific chemicals
- Bulking and preparation for incineration of selected solid organic chemicals
- Aerosol processing

Miscellaneous Processing

- Industrial plastic shredding, washing and recycling
- Industrial container cleaning
- Specialty soil remediation (inorganic/organic contaminants)
